

- Basic Static Routing Lab -

Basic Static Routing – Lab

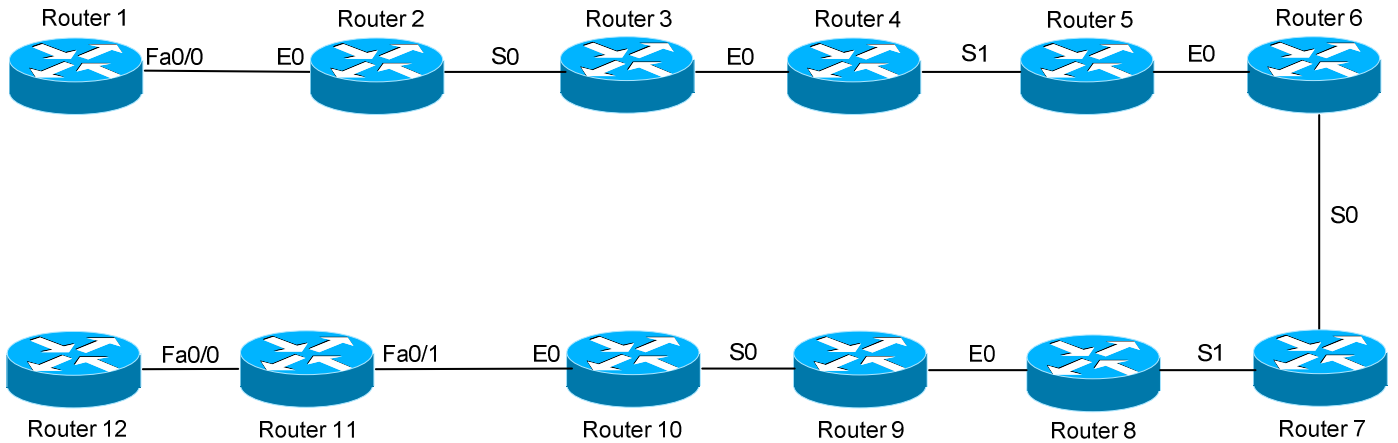

Basic Objectives:

1. Configure and cable the Serial/Ethernet interfaces as indicated in the above diagram.
2. Configure the IP addresses on the routers using the following 192.168.YY.x/24 scheme:

Router 1 – 2 = 192.168.12.x	Router 7 – 8 = 192.168.78.x
Router 2 – 3 = 192.168.23.x	Router 8 – 9 = 192.168.89.x
Router 3 – 4 = 192.168.34.x	Router 9 – 10 = 192.168.109.x
Router 4 – 5 = 192.168.45.x	Router 10 – 11 = 192.168.101.x
Router 5 – 6 = 192.168.56.x	Router 11 – 12 = 192.168.112.x
Router 6 – 7 = 192.168.67.x

Static Routing – Lab (continued)

Static Routing Objectives:

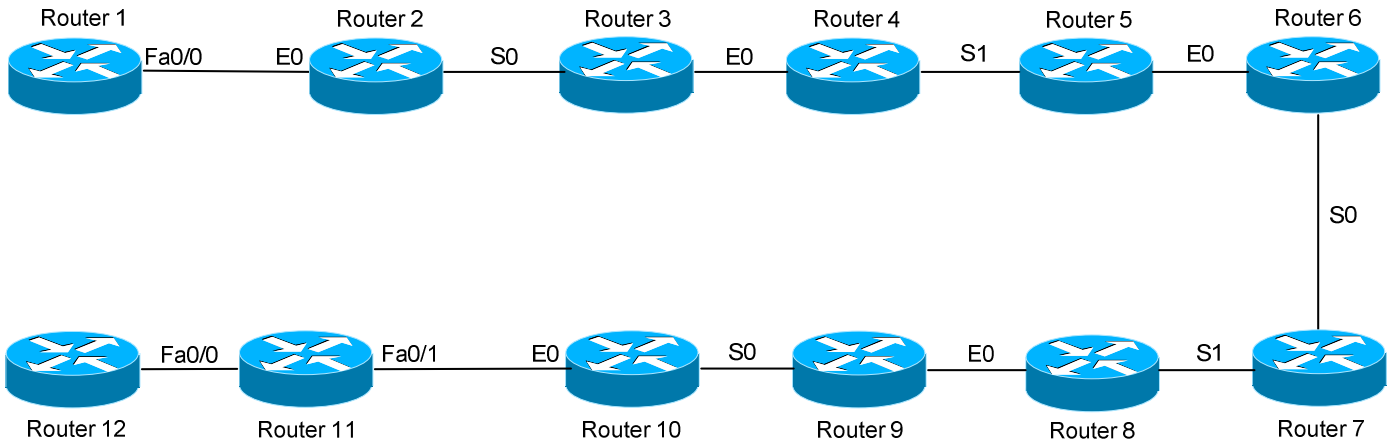

1. Can you ping the routers directly connected to you? Why or why not?

2. Can you ping any router *not* directly connected to you? Why or why not?

3. View your current routing table. What command did you use? What is displayed?

* * *

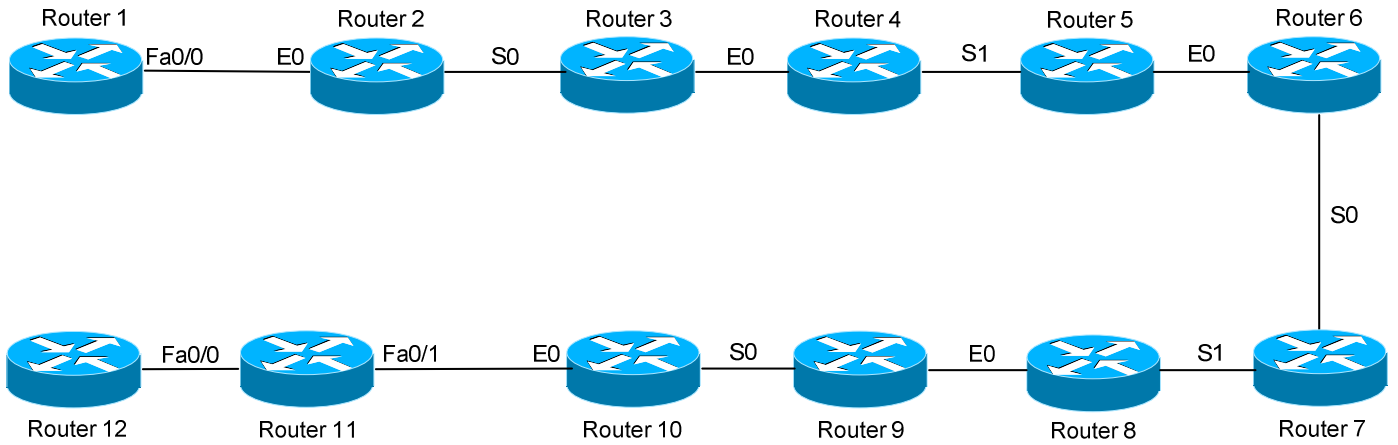

Static Routing – Lab (continued)

6. Perform a traceroute from your router to the furthest router from you. What were the results?

7. View the routing table again. Now what does it show?

Static Routing – Lab (continued)

8. Unplug one of the cables from your router (either Ethernet or Serial). View your routing table again. Has anything changed? Why or why not?

9. Save the configuration. What command did you use?
